University of Vic - BAU School of Design

Barcelona, Spain

Design Thinking: How to Identify New Business Opportunities using Creativity

- Completed a study abroad program in Barcelona focused on understanding product development and innovation in the real world, acquiring the ability to identify new business opportunities and user needs in ambiguous situations

EXPERIENCE

Capital One

Richmond, VA

Software Engineer

Feb 2025 - Present

- Designed and implemented responsive front-end interfaces using HTML, CSS, and JavaScript, ensuring compatibility and seamless functionality across modern browsers to enhance user experience
- Developed and deployed full-stack web applications by integrating RESTful APIs, MVC frameworks, and third-party services like Twitter and Yelp, improving application scalability and functionality
- Collaborated with cross-functional teams in an agile environment, utilizing Git for version control and cloud services for deployment, resulting in streamlined workflows and faster project delivery

Ciena Healthcare

Southfield, MI

Financial Data Analyst

July 2024 - Jan 2025

- Automated the data entry for a cost report using Excel VBA Code and macros, reducing report completion by 30%
- Collaborated with my manager to create an Overtime cost summary report, analyzing year-to-date OT hours and earnings for 45+ healthcare facilities, serving as an indicator for rising costs
- Utilized data analysis skills to find abnormal patterns for costs at the facilities, leading to a 5% reduction in expenses

University of Michigan

Ann Arbor, MI

Product Manager

Sept 2023 - May 2024

- Led a team of 4 students to redesign the Corporate Research Alliances page for the Innovation Partnerships team
- Redefined the brand perception and tailored the user journey by conducting user interviews and creating a journey map, initiating iterative improvements based on identified pain points
- Developed and handed off the prototype based on client feedback, improving user flow and contact form clicks by 15%

UofM Women's Volleyball Team

Ann Arbor, MI

Data Analyst

Sep 2023 - Apr 2024

- Analyzed catapult device data using R and Python to determine player load by examining heart rate, body temperature, velocity, and acceleration, enhancing data-driven decision-making for player management
- Optimized player training by benchmarking target statistics in Excel, designing specific practice drills to address weak areas, resulting in personalized training programs for each player
- Updated the database using SQL to track player loads and identify opportunities for improved player rotations during games, leading to more effective practice load management and a 6% reduction in injury rates

Michigan Sports Business Conference

Ann Arbor, MI

People and Culture Manager

Nov 2022 - Nov 2023

- Collaborated with team members, recruiting partners, and industry professionals to execute MSBC12, a student-led conference with 1000+ attendees, featuring sports figures discussing current events
- Created a recruitment plan and selection process to foster diversity, equity, and inclusion, resulting in a more diverse candidate pool from different majors/schools
- Executed diversity-focused education programming in partnership with on-campus organizations, philanthropic organizations, and industry professionals, addressing DEI issues in the sports industry
