Technical Product Manager | Data-driven, user-centric products

Technical Product Manager who translates ambiguous customer problems into validated solutions — from discovery to prototype to shipped feature. Led a table-view feature at Capital One (99% user migration, +25 NPS), redesigned a corporate partnerships site (+15% conversion), and founded Impulse, a full-stack fintech product, from 0-to-1. Fluent across front-end development, cloud infrastructure (AWS Certified), and full-stack delivery — comfortable owning execution end-to-end.

EDUCATION

University of Michigan – School of Information

Ann Arbor, MI

Bachelor of Science in Information

EXPERIENCE

Impulse (Budgeting App)

Founder & Lead Developer

Apr 2026 - Present

- Defined product vision and technical architecture for Impulse, a full-stack budgeting app integrating Plaid API across all supported account types; onboarded 5 beta testers to validate a secure Supabase (PostgreSQL RLS) data layer for real-time transaction aggregation
- Leveraged Claude Code to accelerate research synthesis, PRD drafting, and full-stack development, taking Impulse from concept to a working MVP in 6 weeks, solo
- Leveraged user research from my 800+ member content audience — analyzing engagement analytics and audience queries — to define Impulse's product roadmap

Capital One

Richmond, VA

Software Engineer

Feb 2025 - Present

- Led discovery and prioritization for a new table-view feature, then personally built the front-end implementation — driving 99% user migration from the legacy view and a 25-point increase in NPS
- Designed and built an end-to-end RAG pipeline for an in-house Intelligent Document Understanding system — from document ingestion (SQS, DynamoDB) to an automated OpenSearch sync job — powering Claude-based LLM responses via an MCP client-server integration
- Led Fun and Service initiative for 80+ associates, managing a \$40K annual budget to deliver 2 monthly events and 1 quarterly signature event, driving cross-functional engagement

Ciena Healthcare

Southfield, MI

Financial Data Analyst

Jul 2024 - Jan 2025

- Built an overtime cost analytics report for 45+ healthcare facilities, identifying cost anomalies that drove a 5% reduction in operational expenses

University of Michigan

Ann Arbor, MI

Product Manager

Sep 2023 - May 2024

- Led a cross-functional team of 4 students to completely redesign the Corporate Research Alliances web experience, aligning user needs with overarching business goals for the Innovation Partnerships team
- Conducted 14 user interviews and developed comprehensive journey maps to identify core pain points, driving iterative, user-centric improvements to the platform
- Validated design direction with a high-fidelity prototype and direct client feedback before full development — de-risking build investment and driving a 15% increase in conversion rate (contact form clicks)

University of Michigan Women's Volleyball Team

Ann Arbor, MI

Data Analyst

Sep 2023 - May 2024

- Leveraged R, Python, and SQL to analyze Catapult sensor data, identifying strategic rotation opportunities that optimized practice management and drove a 6% reduction in team injury rates
